

Exchange of Ideas Essential to Solve Present Situation

Dr. Adams Discusses General Aspects of "The New Era"

MOYSE HALL CROWDED

Large Assembly Present at Inauguration of Graduate's Series of Lectures

Old and young, men and women, from all walks of life, graduates, undergraduates, and the great public, combined in filling Moyses Hall to capacity yesterday to hear Professor Adams' first lecture, which was on "The New Era." Dean Corbett of the Faculty of Law introduced the lecturer, and emphasized the point that, through the funds provided by the graduates, those interested will be privileged to hear a whole series of lectures instead of just one, as is so often the case with famous men.

Professor Adams in his introductory remarks said that he had visited McGill twenty-eight years ago, and was glad to be here again. "Anything which tends to reunite an Alma-Mater and her graduates is of the greatest value to both of them."

"No one man can fully understand the complexity of the present situation; it can only be solved by men coming together and exchanging ideas. Forty years ago, as an undergraduate at Glasgow, I heard Balfour's Recital address on "Progress" which is the subject of this series of lectures. In that address he struck a note of philosophic doubt. He looked at the question of human raw material and then asked whether or not there is any evidence of progress. Thirty years later, Professor Bury of Cambridge said that Balfour's doubts were still unanswered, but that the conception of progress, although comparatively new, has become the working faith of our life and society."

Development of Idea of Progress. "Modern ideas on progress start from the development of Science at the end of the 18th and more especially (Continued on Page Two)

Freshette Wins Debating Trophy

Alice Johannsen Awarded First Prize at Contest

Getting their own back on the upperclasswomen for having earlier in the year, R. V. C. Freshettes came out victorious in the annual speaking contest of the Delta Sigma Society, when Alice Johannsen of first year carried off the prize. The second prize was won by Mary Hill, a senior, while Estelle Steinberg and Isabel Dawson won the second year trophy.

The winning speech was on "Eskimoing," and the speaker traced the evolution of the sport through the years. The word eskimo comes from an ancient Norse word skida—a split log, and the sport itself developed from a form of snowshoeing which had its birth in the mountains of Central Asia, where it was used as a means of rapid transportation in winter. Only in the early eighties was it introduced into Switzerland, where it soon became a predominant sport. In America skis were first used by a Norwegian mail-carrier of California in 1827.

The sport passed into the pages of history during the wars of Charles XII of Sweden, where they were used to quite an extent, and more recently in Harald Andersen's conquest of the North Pole.

Maintaining the dignity of the senior year, Mary Hill spoke on the proposed amalgamation of the M. W. S. S. and the Students' Society. While refraining from actually speaking against the proposal, the speaker considered nothing should be done until all the students to be affected should understand the question thoroughly.

Isabel Dawson and Estelle Steinberg won the trophy for second year, the former speaking on travel and the latter on "Envelopes and What they mean." Doreen Harvey-Jellie was congratulated by the judges for her tale on nursery rhymes.

Attention Arts '31

A number of the members of the class have not as yet given their addresses to the permanent class secretary. They are requested to do so immediately. A list of names of the delinquents appears on page four.

SPEAKS FOR MCGILL

H. CARL GOLDENBURG, who will with Fred Stone, debate against Cornell this evening.

Revue Principals Completing Work

Red And White Officials Report Brisk Ticket Sales

REHEARSE TOMORROW

Choral Society Stars Play in "Trial by Fury" Skit

With exactly five days to go to the opening night and a brisk ticket sale backing their efforts, members of the 1931 Red and White Revue are busily engaged in polishing off their parts for McGill's all-student skit and musical extravaganza to be put on in the Moyses Hall for a five day run beginning next Tuesday evening. Producer Bruce Hoes has his staff of some sixty male and female personalities going at high gear to complete the production for its premiere offering to McGill's graduates.

Following upon the announcement that several Choral Society stars have been secured to present a skit "Trial by Fury," along Gilbert and Sullivan lines, in which Bruce Hallet and Lellie Dodd assume leading roles, the remaining principals in this year's revue are more than anxious to gain popularity before the flooded footlights. Besides several other promising skits which will be swung together through the medium of a main theme running through the show, the revue will also feature specialty artists and dancing teams. Two groups of chorines will aid the orchestra in their offering of the various musical compositions. General rehearsals will be held tomorrow, one in the afternoon at the Union, with a complete dress rehearsal tomorrow evening in Moyses Hall.

Announcement is also made to the effect that the program committee have completed their work, and the program will be sent to press today. The committee state that they have been highly successful in arranging a colorful scheme, both in design and arrangement.

The ticket committee report successful returns at the box office. There are still several seats left for the Graduate Night and these are expected to be snapped up. Distribution of tickets for the other performances is also evident, and all in all, it is expected that this year's Red and White Revue will go over with great success.

To Discuss Rising Chinese Civilisation

Lady Hoesie Will Lecture at People's Forum

China the home and stronghold of the most ancient civilization of the world, is falling before the rise of the machine, which is slowly and inexorably sweeping its ancient traditions and threatening to replace the old civilization which has withstood the attacks of over twenty centuries, with another. To interpret the trend of this new civilization is a task many have undertaken, but one of the most capable to do this is Lady Hoesie, who speaks Sunday evening at the People's Forum, on "An Englishwoman at China."

Lady Hoesie was born and educated in South China, and speaks with an unusual and colorful background, coming from life-long experience in that country. She is the author of two books on China, "Portrait of a Chinese Lady" and "Two Gentlemen of China," and, in collaboration with her husband, Sir Alexander Hoesie, produced a commercial map of China which is now considered the authoritative map of the country.

Parish, Houghton Run in Plumber's Society Elections

Murray and Brown Nominated For Vice-President's Office

NINE CANDIDATES

Elections Take Place Next Week; Many Sign Nominations

All the nominations for the various offices of the Science Undergraduate Society have now reached those in charge of the matter. The elections will take place next week. Considerable interest is being taken by the Plumber's, judging by the number of signatures appended to the various nominations.

Parish and Houghton are running for the Presidency, Brown and Murray are candidates for the Vice-Presidency. There is only one nominee for the office of Treasurer, Nesbitt, while Armstrong and Seybold are rivals for the Secretaryship. The only office open to this year's freshmen, that of Assistant-Secretary, is being contested by Dodd and Ross. The list of candidates and their nominators follows:—

We, the undersigned, do hereby nominate **Thomas W. Houghton**, of third year for president of the Science Undergraduate Society. R. A. Crain, Palmer Savage, C. E. Parish, John S. Saunders, A. H. Walter, J. A. Oulmet, O. B. Mason, O. M. Clarke, H. W. Leo, O. Deane Nesbitt, Gilbert Painter, A. L. Hough, H. G. Seybold, H. H. Tinkler, J. E. Potts, Arthur W. Shute.

We, the undersigned, nominate **T. W. Houghton** for the office of President of the Science Undergraduate Society. Harold Price, Trevor Holland, K. Y. Lockhead, Walter R. Penny, Gordon J. Jue, David C. Dobbin, Gordon D. Poole, E. Gersowitz, J. S. Baecker, W. C. Lea, N. Siegel, T. M. Althausen.

We, the undersigned, do hereby nominate **Charles E. Parish** for President. (Continued on Page Four)

Women Candidates Active on Campus

Prominent Co-eds Nominated For President of M.W.S.S.

Election of the President of the McGill Women Students' Society will take place next Tuesday, March seventeenth. Balloting will take place in the R. V. C. and in the Arts Building, from nine a.m. until five p.m. Any ballots cast before or after these hours will be illegal.

The two candidates are both women of many activities. They are well-known for their interest in student affairs and are both members of the class of 1932.

Jean G. Campbell was born in Ottawa, and has attended McGill since her Freshman year. She is president and former secretary of the M. W. S. S. Rifle Club, and is a member of the Royal Victoria College House Committee. She is a representative on the M. W. S. Athletic Association, and has been a member of the Inter-Collegiate Basketball Team for two years.

Doreen J. Harvey-Jellie was born in England, but migrated to Canada at the age of three. In her first year at McGill she was secretary-treasurer of the Rifle Club and acted in one of the productions of the Players' Club. In her second year she played class basketball and was second year representative in the Societe Francaise. In both her freshman and sophomore years she was winner of the Impromptu Speaking Contest of the Delta Sigma Society, and for the past two years she has been a member of the Intercollegiate Debating Teams. In her third year, she was secretary-treasurer of the House of Commons Club, vice-president of the Societe Francaise, and a member of the Players' Club. For three years she has played class hockey and acted in French skits.

Every woman undergraduate is urged to turn out and vote next Tuesday.

Tells of Star Structure

"Stellar Structure" was the subject of yesterday's Physics Colloquium. The speaker was Dr. R. H. Fowler, of Trinity College, Cambridge. He gave a synopsis and a short criticism of Eddington's theory of the emission of energy from a star.

"Water Babies" Will Be Shown This Afternoon

Once again, the Children's Play, "Water Babies," will be repeated in Moyses Hall, under the joint auspices of the English Department and the Department of Extra-Mural Relations. The performance will take place tomorrow afternoon at three-thirty.

The play has been adapted from the well-known story by Charles Kingsley, and is being presented in six different scenes, in which the costumes and scenic effects have been designed and carried out by the students of English 13 and 22, under the direction of Miss Marguerite Strathay. A number of tickets have been sold already, and as the seating capacity of Moyses Hall is limited, parents are urged to procure their tickets now from the Comptroller's Office, in order to avoid disappointment.

Claimant Sought For '06 Trophy

Peculiar Condition Governs Award of Arts Cup

FORGOTTEN IN UNION

Pelletier, Son of Graduate Now at McGill, Thought Winner

In the list printed below will be found the names of the graduating class of Arts '06 who presented a cup on the year of their graduation to the first member whose son appeared at McGill. However, during the twenty-five years which have elapsed since then, the cup has been forgotten; and the student to whom this trophy rightfully belongs is in doubt.

It would greatly aid the Graduates' Society in clearing up this matter if those students whose fathers went to McGill, would look over the list to see if their names appear there. William C. Pelletier, Arts 2, son of the late Alexis D. Pelletier, is up to the present time the only known son of a member of Arts '06 at McGill, and is, until further names are discovered, the rightful claimant.

Cup Recently Noticed

It was only the other day that the cup, which is in the lounge of the Union, was being cleaned, when it was noticed that no name denoting the possessor appeared to be engraved on it. Inquiry was made to Mr. Glasco of the Graduates' School, who verified these suppositions. It being now twenty-five years since the cup was presented it is possible that the claimant has already come and left the university.

Below are the names of the graduates of '06 in Arts. Any person who can cast light upon the sons of any of the men is asked to give their information to Mr. Glasco, Graduate School.

S. A. Baillie, G. Barclay, W. L. (Continued on Page Three)

Musical Concerts Given at Ogilvy's

Specially Arranged Lectures For Young People

A series of concerts for young people are being held in Tabor Hall, James A. Ogilvy Ltd., under the auspices of the Department of Extra-Mural Relations, the National Council of Education, the I.O.D.E. and the Junior League of Montreal. Short lectures are given with each of these concerts. The subjects of these lectures will be of general musical interest, comprising the History of the various Musical Instruments and types of Music.

The speaker for these lectures will be G. A. Sancton, L.R.A.M., A.R.C.M. These lectures will be on the Piano, the Violin, the Cello, and the Quintet. To cover the various costs in connection with the undertaking, there will be a charge of twenty-five cents per lecture. The lectures will take place every Saturday at 10.30 A. M. sharp, over a period of four weeks. When this series reaches completion, it is planned to inaugurate a further series in continuation. The series is planned especially for young people. The dates of the concerts and lectures follow:—
March 7th, The Piano. March 14th, The Violin. March 21st, The Cello. March 28th, The Quintet. Admission twenty-five cents.

Cornell Meeting McGill Debaters In Last Tourney

R. V. C. Convocation Hall Scene of International Contest

MANY EXPECTED

American Policy With Europe to Be Discussed Tonight

McGill debaters make their final appearance before the public tonight after a successful season. They are opposing debaters from Cornell on the subject, "Resolved that this house condemns the foreign policy of the United States in regard to European affairs." McGill representatives are H. Carl Goldenburg and Fred Stone, while from Cornell come Edward Fitz-Patrick, and Herbert Levy. The international aspect of this debate makes it particularly attractive.

The scene of the meeting is the Convocation Hall of R. V. C., which has been the location of other great debates. It was there that the Portoricans and the British teams were beaten. The McGill speakers have attracted a great deal of attention, and it is expected that a record crowd will attend this next and last debate. All are being admitted free of charge.

All Well Known

Both McGill men are well known for their debating skill. Goldenburg has debated in intercollegiate circles for several years and won additional honor and renown in Mock Parliament meetings. He is also an executive who has held many posts on the campus, and is also the President of the Debating Union Society for next year.

Fred Stone is also an executive man and a speaker of note. He has been the winner of the Talbot Papineau Cup and the Bovey Shield and has represented McGill in several intercollegiate debates and was an executive of the Class of Economics 1.

After the election papers were delivered by Baker and Rountree on the subject of "The British Empire and its Problems" Kenneth Baker dealt with the constitutional aspects, while his colleague, G. M. Rountree, handled the trade and economic side of the question.

Status Uncertain

"The Empire being by a large extent decentralized, much thought must be given to the ties which bind us together." Baker quoted from an address given by General Smuts. By the terms of Lord Balfour's statement 1926, the Dominions are autonomous states within the Empire. But only South Africa and Ireland have the power to alter and amend their constitutions. Canada, according to B. N. A. act, has not this power. Australia and New Zealand only partially.

However the Colonial Laws Validity Act, 1863, states that colonial legislation may be valid although it is repugnant to the English Common Law, but it is null and void if conflicting with any Imperial act extending to that province. Consequently a problem of status is presented resembling, to quote Dr. Leacock, "the philosophical donkey between two balls of hay."

Progress in India

The latter part of the speech dealt with the Indian question. The re- (Continued on Page Two)

Organ Recital

There will be an organ recital on Sunday, March 15th, at Notre Dame Cathedral, Place d'Armes. Students are cordially invited to attend. Admission is free. The time is 4.15 p.m.

Amalgamation Vital Problem in Opinion Of Women Speakers

Jean Campbell And Doreen Harvey-Jellie Candidates For Presidency of M.W.S.S. — Large Audience Hears Speakers Talk on Fusion With Student's Society.

OPINIONS OF WOMEN ASKED BY RUTH DOW

Students Divided in Opinion on Joining of Men's And Women's Organisations.

AMALGAMATION, to be or not to be, was the vital factor of the speeches of the two candidates for the Presidency of the McGill Women Students' Society, given at the meeting of the Society which took place yesterday at one o'clock in Moyses Hall. Ruth Dow, President of the Society, urged every woman undergraduate to write her opinion, whether favorable or unfavorable, of the amalgamation of the Students' Society and the M.W.S.S. and to attend the next meeting of the M.W.S.S. on Thursday, March nineteenth, at four o'clock in the R.V.C. Common Room.

Jean Campbell, the first candidate to say a few words, spoke as follows. "May I say, first, that I thoroughly appreciate the honor of receiving this nomination. If you elect me and if McGill finally votes to unite the men's and women's governing bodies, I shall do all in my power to represent you capably and intelligently and to place the women's viewpoint clearly before the Council in all matters affecting the women. On the other hand, if it is decided to continue the men's and women's organizations as they are at present, I shall endeavour to maintain the high standard of efficiency established by my predecessors."

Doreen Harvey-Jellie, the other candidate, declared that her sentiments were the same as those of her competitor. She stated that she was strongly in favor of amalgamation. Women students would have to join with the men students some time, so why not now? She declared that she was for bigger and better cakes at society meetings, and especially that there should be women in the Scarlet Key.

Ruth Dow, the outgoing president, made an effort to arouse all possible interest among the women students over the question of amalgamation of the two undergraduate societies. (Continued on Page Three)

Students Present Satire by Jonson

"Volpone" Gives Cutting Caricature of Miserliness

The grim comedy of "Volpone" or "The Fox" was presented last night by the students in English 13 and English 22 at Moyses Hall. The version offered is not Ben Jonson's play in its original form, but the convenient adaptation by Stefan Sweg, as translated from German by Ruth Langner.

Volpone, a rich Levantine merchant with the desire to become still richer, has in his power Mosca, who, partly through compulsion and partly through desire, aids his master in his plans. They conspire to dupe Volpone, a lawyer, Corbaccio, a miser and Corbino, a merchant by pretending that Volpone, is on his death-bed and is about to make his will, leaving all his possessions to his best friend immediately they all hurry to shower Volpone with gifts. In the hope that he will make one of them his sole heir, Volpone extricates him from a charge of assaulting Corbino, who was "loaned" to Volpone by her husband Corbino, who also presented Volpone with some other valuable gifts. Corbaccio gives him some gold, and makes him his sole heir, thinking that Volpone is breathing his last. The play is then brought to a most successful climax when Volpone pretends to be dead, and all assemble to hear the will read. Mosca is revealed as his heir, and he placates the others by returning all they have given to Volpone. He then forces Volpone to leave Venice, and the end of the play leaves everybody contented but Volpone, who has received a just penalty for his villainies.

Volpone is played by Charles Rittenhouse, Mosca by Jacques Herdt, Volpone by Samuel Vatcher, Corbino by Roland Bodger, Corbaccio by William Statkoff, Canina by Elma Perriard, Colomba by Katherine Hingston, Leone by Cedric Mooney, Judge by Kenneth MacMillan, Captain of the Ship by William Sellar, Singer by Bruce Hallett, Servant (Volpone's house) by Myer Gelfman, Servant (Corbaccio's house) by William Adams.

Up To The Women

The ball that Mrs. Vaughan started rolling has taken effect at last. The time has come when McGill women students must wake up and take notice, for the fate of the present system of undergraduate women's government will soon be in their hands to decide.

Next Wednesday, the eighteenth of March, the Students' Society meets to decide whether or not women will be admitted into its fold, and if a woman representative shall sit on the Students' Council. If the Society decides to admit women, it will be up to the women to decide whether they wish to amalgamate with the men. The action of the Students' Council in recognizing women as members of the University and therefore worthy of representation upon the Council is, to say the least, courteous and thoughtful. It is up to the women students to be as courteous in their reply and in their decisions.

It has been suggested that, as many members of the R.V.C. do not possess a full understanding of the responsibilities, financial and otherwise, which amalgamation should entail, very careful consideration should be given to the question before a decision is reached. Women students, this is your responsibility. The men have done their part, now you must do yours.

The New Era

Within each of us there is a feeling that the world has progressed since it entered upon the era of mechanical advance. Many, perhaps, have never sorted their ideas out very clearly and have been easily convinced of the contrary by professors wishing to test their reasoning powers. It is also a constantly recurring debating resolution and the side claiming that there has been no progress can be depended upon to introduce a very strong case.

This confusion, if it existed in the minds of any who heard Professor Adams in the Moyse Hall yesterday, must have been dispelled by the logical, clear and, above all, optimistic analysis which the visiting lecturer gave of the various aspects and trends of progress which are visible in the world today. The mechanical age has brought its problems, but according to the lecturer modern progress is definitely a fact beyond contradiction. Our striving to educate, our quest after peace and the return to a new sort of family life which Professor Adams sees are all indications that in spite of evils we do progress.

Those who went in hope of striking utterances were disappointed. The lecturer confined himself to an introductory but relevant chapter of the work which is to follow at the next seven meetings.

Newer Politics

In England women stump the country during election campaigns. The same thing is done here but in a much quieter way, for the ladies of his Dominion are reluctant to don the war-paint of political controversy or adopt the tribal whoops which are uttered on such occasions. Instead, they say polite things about their opponents and actually discuss public questions with "Pro Bono Publico" and "Constant Reader." Naturally, they never get elected, so the Canadian House of Commons is an all-male institution blemished only by one or two unfortunate encroachments. The British House is full of women—there must be twenty of them; and all these speak at places like Wapping-under-Mere from the back seat of a roadster while open-mouthed yokels wonder that women can meet male players of the political Army Game with rant for rant and insult for insult.

We notice with some trepidation that the McGill Women Students' Society has adopted overseas methods in making the candidates for the Presidency address an open meeting. No heckling was reported and very little rowdiness. Both candidates appeared to favor amalgamation—one violently and the other somewhat more cau-

ously. Everything concluded in the best possible way when one of the girls announced herself strong for bigger and better cakes at the various pink teas which seem to clutter up most of the R.V.C. most of the time.

CORRESPONDENCE

Professor Adams's Lecturers

The Editor,
McGill Daily
Sir:—

In common with many others, I am very much interested in this series of lectures, but unfortunately the hour arranged is too early to permit me to take advantage of the opportunity to hear our distinguished visitor.

I fully appreciate the fact that the lectures are intended primarily for the Faculty and Graduates of McGill, but there are many engaged in business who will find it impossible to be present at 5 o'clock, as few of us can leave our office in time to reach the University so early in the evening. If it could be arranged to have them start at 5.30 or 6 p.m. (if they cannot be held later than that) many business men would gladly attend the lectures to their own and their employers benefit.

Yours truly,

Bank Clerk

The Editor,
McGill Daily
Dear Sir,

I wish to express, through your columns, my opinion on the question of the amalgamation of the M.W.S.S. and the Students' Council (sic). Should I be elected president of the M.W.S.S. for the next year I would naturally uphold any decision which the women students might arrive at. However, I am free to have my own opinions. I think that to live up to the word "Co-educational", McGill should be governed by one not two bodies. The great obstacle in the minds of many to this united governing body seems to be the question of finance. Has no one really thought about the subject? Should both the men and the women agree to unite, then would be the time to arrange the details. No one is going to waste time thrashing out the details of a futile project. One the union is formed, the M.W.S.S. president, whoever she may be, will see that the women get a square deal, and the men will undoubtedly do the same for themselves. The whole undertaking will only be launched if all the McGill students signify their interest and desire that things should be so. I think the amalgamation is inevitable, so why not have it in our time instead of letting the students of the future arrange the matter. We should prefer to make history ourselves, not leave it to others.

It has been said, "What good will come of this Union?" But what harm will come of it. The benefits will be numerous as the various clubs and societies will be strengthened by the new government. It does not advise the women students to vote for amalgamation on the ground of Women's Rights, but rather for the public good, and also to vote for it in a spirit of adventure. Next year should bring great changes. Let us have a voice in these instead of being silenced by our lack of unity.

Thanking you sir, for your space.

Yours very truly,

Doreen Harvey-Jellie
R.V.C. '32

The Editor,
McGill Daily
Dear Sir,

May I, through the Daily, thank those who nominated me, and those whose support resulted in my election. I shall bend every effort to be a true representative of student opinion in athletic councils and thereby prove worthy of the honor you have bestowed upon me.

Very truly yours,

C. R. Drew

The Editor,
McGill Daily
Dear Sir,

May I take this opportunity to congratulate Gordon King on his election and to thank those who supported me.

Robb McDonald

The Editor,
McGill Daily
Montreal.

Dear Sir:

May I take this opportunity to express my appreciation of the support accorded me in the recent elections. I shall endeavour to merit this confidence.

I would like also to congratulate Messrs. Smit and Parish on their sportsmanlike campaigns. I look forward very much to working with them on the Students' Council next year.

Yours sincerely,

J. A. Edmison.

The Editor,
McGill Daily
Dear Sir:

At a meeting of the Delta Sigma Society today interest in the proposed amalgamation of the men's and women's governmental bodies in McGill was finally awakened by Miss Hill's admirable speech; and the attitude of the society was found to be that a thorough investigation of the details of the subject, especially financial, should be made. The members expressed a desire to know exactly what changes would be made in the levying and disposal of their money, and the advantages to be accrued thereby.

On being questioned why this had not already been done, Miss Dow informed us that the attitude of the men's council is that no definite plan shall be set forth until the question is decided by both parties, and that then, if in favor, the women will have their fair say in the arrangements.

Both these attitudes seem reasonable and justified; but they are incompatible as they stand. Therefore I wish to present the conclusion I have drawn.

Rather than a report of what changes would be made in the event of amalgamation, I should like to see a comprehensive report of where our money goes now and where the men's goes. This report, I think, should be presented in such a way that every student could draw his own conclusions, or form his own opinion as to what would have to be changed and whether the amalgamation proposed is wise or not.

Now the program I present is this: That a report of this sort be made public by Monday;

(a member of the executive of the M.W.S.S. should be in a position to give us the facts clearly); that the two candidates for the woman presidency, if still in favor of the amalgamation, present a definite platform of what "say" that they are going to make in the new arrangements; and that on Tuesday every woman student vote with a clear idea of what, besides whom, she is going to vote for.

This is a definite and demanding program, as it asks not only hard work but quick work; and coming as it does from an individual student (for I have discussed the definite project with none) I would hardly dare hope that it might be acted on, did it not seem to me the obvious conclusion to be drawn from the discussion at today's meeting.

The question of platforms is another important matter. After today's electrifying meeting I found myself not eager to vote at all. I know little of the respective attainments of the two candidates, and they both presented the same platform (if, indeed, it can be called a platform) namely, to do their best if elected either to present the women's point of view in the event of amalgamation, or to be a good president of the M.W.S.S. If, however, they could present definite platforms on such a basis as I have proposed, I believe every woman student would feel the urge to vote next Tuesday.

Yours truly,

Eleanor D. Reid, R.V.C. '34.

College Comment

COLLEGE BLUES

In most every student's life there comes at depressing intervals what is known as College Blues. Some choose to call it mental depression, morbidity, or minor melancholia, but all these are considered under the one head—College Blues. In some it becomes so poignant that they threaten to leave their Alma Mater and hire out as common laborers. Some it touches only lightly, causing them to merely wish that they were in some other environment other than the college environment, and the next moment see them again happy and glad to be in the melee for education; they do not sink into the deep shadows of morbid reflection and wonder why they are living, or what being in college really amounts to after all, or why they cannot be as others, and numerous other melancholy thoughts.

Freshmen, sophomores, juniors and seniors are subject to the disease. It is a disease, yet, we make the statement, and dogmatically, that it requires a student with a little something in his head to catch it. The ones who are most affected by it are in most cases highly temperamental and have not the strength to throw it off. Those who receive a minor inflection are either those who have strength of mind enough to cast it aside, or have not developed their minds to the point where it can be affected by the College Blues.

The theory of it all is that college students emphasize the mental more often than the physical, are dependent on their own initiative when they have had access to another's all their lives, probably at home, and the lack of a person to confide their sorrows in.

Whether we view those blues in another person or are ourselves subject to their dominating influence, we realize their significance and meaning, and know that College Blues is an actual illness to be observed in most every undergraduate school and in most all students.

—The Wesleyan Pharos.

A BOOMERANG

The voice of the student has often been raised to the skies in criticism of the gloating pedagogue who delights in placing barriers in the path of the undergraduate in the form of unmerciful and needlessly unpassable examinations. At last, it seems, the laugh has been turned.

It has been interesting, indeed, to watch the effect of an idea of one of our contemporaries. The Columbia Spectator. This campus newspaper tendered a set of questions, all calling for general information, to 62 professors and instructors, chosen because of the difficult quizzes that they give. Of this number, only 19 answered the entire group of questions and many of them received grades lower than those given to some of the undergraduates who took the same examination.

But of all the facts brought to light in this turning of the tables, the one which will bring a smile to student lips the country over, is the information that there was a decided tendency of the educators to bluff when the answer was not known. The distinction cannot, of course, be drawn from this, that every individual member of the class of instructors who lecture so vehemently on the vices of bluffing would prove so hypocritical. But at least the curtain has been raised, revealing what few students have been able to discover and what every undergraduate has desired to see, the austere faculty member in his true being.

However, in all seriousness, this incident has brought forward a few deplorable facts. In spite of the specialization of courses and the distinct dividing line which separates the different sciences and arts, the instructor should, to teach any course with a certain amount of success, have a fair general education. If it can be true that students can obtain widespread knowledge, it should also be true that the professor not only could but should do likewise.

—Syracuse Daily Orange.

FUNNY FELLOWS

It so often happens that classes are cheapened by obviously clever young men who cannot restrain their impulses sufficiently to save their wise-cracks until free from the necessary decorum of the class meeting. Professors for the most part are kindly souls and do not object to the injection of a little humor into their lectures. However, the professors are in a position to furnish the humor themselves. In the first place, it is their privilege to do so if they choose, and not the students'; secondly, they are much better equipped mentally to do so. Student humor, when pitted against that of the average professor, seems so shallow and weak.

But the real point to consider is this: Classes do not meet for the purpose of providing opportunity for clever fellows to air their wit. Classes meet in order that students—meaning real students—may learn something of value to them. The meetings should not be without a certain dignity or interest in the subject becomes secondary to interest in the social success of the class.

If professors are clever and thoughtful enough to relieve the mental tension of their students with an occasional humorous remark, more power to them. It is not for funny fellows in back rows to usurp their attitude.

—Marquette Tribune.

Exchange of Ideas Essential to Solve Present Situation

(Continued from Page One)

ally the middle of the 15th. Centuries. But what exactly is Progress? The most familiar conception of it is that of the steady improvement of society as regards well-being, more security, more individual opportunity, and so on. The two chief elements in our conception are the growth of Knowledge and the growth of Equality. Ignorance is a bar to progress.

The growth of the Idea of Equality is peculiar to the 20th century. We do not mean uniformity, but rather equality of opportunity and the exercise of certain rights. The desire for it is one of the chief elements in modern progress. Equality politically, socially and economically are being eagerly sought after. The breaking-down of barriers is very apparent in the Old World.

Three Periods in The New Era

"Turning to a more special consideration of the New Era. It is the greatest period in history. It is one of baffling complexity, and yet the dispassionate and truthful study of it is essential. I have divided it into three periods — 1895-1914, 1914-1918 and, from the end of the War to the present day. The awakening of new thought in Science and elsewhere is characteristic of the first period; also its influence on the body politic. A less dogmatic and more lively spirit in tackling deceptive problems is most noticeable, especially in the fields of pure and social science.

Also a new fluidity of thought is apparent, which adds to the complexity but prevents the crudity which accompanies most great advances. A new social policy as regards the state and the community was also being developed during these years. Wireless and the petrol engine were cementing the world more closely together. In England there was a building up of social insurance and mutual help which enabled her to meet and overcome the Great War.

"The war period used and consolidated — rather than destroyed the work of the first period. There was a community development which bound together the voluntary and the statutory, and the state put new effort into the mobilization of the community, so that with all its tragedy, the war aided the struggle for individual and national liberty, which has influenced the third, or reconstruction period.

Post-War Hunt For Fundamentals

This period is divided into two parts actual reconstruction, and then the desire to build something new and better. The chief features of this period are the growth of international consolidation, the return to nationalism, especially in the Unchanging East and the new conception of social life and community organization. In England there is a growing sense of the good community, and a growing attachment to it. Greatest of all, there is a retting back to fundime, especially that of the family as the nursery of personality, and the home as the basis of our community. We believe in God Freedom, and morality — like the community. These are the valuable things in life, and they underlie great and continued progress."

Economics' Club Elects Officers

(Continued from Page One)

cent Round Table Conference recognized that responsible government would be granted as soon as any such system could be brought about by an act of parliament. The delegates at the conference were themselves at variance as to whether a federal scheme could be effective. A plan for a central government was made, and certain powers were to be reserved for the viceroys.

"Complete protection for England is economic suicide," stated G. M. Rountree "but a tariff on goods outside the empire is another matter." Developing this idea the speaker showed the cleverness with which Lord Beaverbrook had called protection free trade, he said that although many of Beaverbrook's arguments were false the idea was in his opinion sound. It meant free trade between those parts of the empire not self-governing.

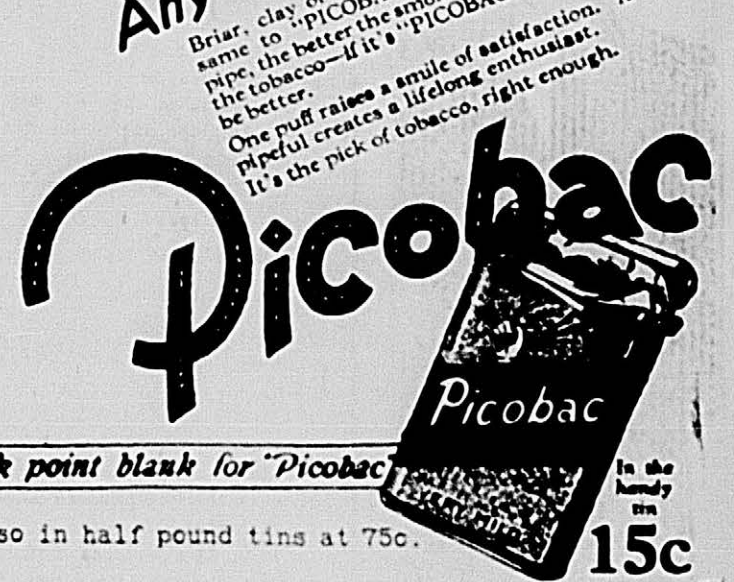

Rountree Cites Proposals

Other proposals to unify the empire had been given in the last imperial conference by Thomas; the quota system, to be subject to government control, and import boards, who would supervise imports, were the main schemes brought forward. The speaker denounced Mr. Bennett's "preferential" tariff as being too selfish and of too slight import to be effective. Imports from Britain showed but small increases when 33% preference was given at the beginning of the century, and it is not likely that a 10% additional tariff will make much difference.

A pieb from Arkansas was sawing away at the sinewy knee-joint of a fried chicken leg. The knife was sharp and he was athletic—he made but little headway.

He waved his arm toward a bottle of ketchup which stood on the table near his neighbor's elbow. "Pass the ketchup, please, sir," he requested, "this sea-gull has rheumatism."

Medicine Juniors Win From Science In 2 to 1 Fixture

Ragged Hockey Features First Clean Game In Ten Year

NO PENALTIES

Law 1 will play Meds 3 for the class hockey championship at the Forum on Monday afternoon. The time will be announced later.

MED. 3 sextet came through in the second game of the semi-final round yesterday afternoon to win 2 to 1 from the Engineering Freshmen. The game was entirely different from the first one which ended in a 3 to 3 draw, and much to the surprise of the thousands who thronged the Forum, was the first clean Med-Science game in the past ten years. As a result the spectators saw some exceptionally good hockey, especially for intra-mural sport.

Ragged Hockey

The two teams, which were evenly matched, started the game with a ragged exhibition of hockey and the first period saw the puck going up and down the ice on lone rushes. The play however soon tightened up and the combination of Chalmers and Kritzwelser for Med and that of Ogilvie and Daigneault for the Plumbers gave the net minders some anxious moments.

Gamble, Med defence man, taking no chances in the second tilt, the first being the usual Med-Science game with plenty of high sticks, came out in a football helmet much to the amusement of the opposing stick-handlers. Both teams had a number of chances to score but poor shooting and good net minding on the part of both goalies accounted for the low score. About ten minutes after play had started Gamble of Med pushed the puck past the blue line and shot. The puck, bouncing on the ice, beat Gilmour for the first goal. Two minutes later Ogilvie, Science centre, beat both Med defence and lured Leboldus out of his nets to push the puck in for the prettiest goal of the game. The Engineers heartened by this effort forced the pace and it was only the lack of a break that prevented them from scoring again before the end of the period.

Fast Play

The second period opened with a better show of hockey on both sides and the combination play was only marred by poor shooting. Chalmers and Kritzwelser came through the entire freshman team time after time only to lose by poor shots. Finally this fast pair came down in a combination rush. Chalmers shot from the vicinity of the blue line to beat Gilmour for the second tally for Med. The Engineers retaliated with a rush by Ogilvie and Daigneault which was only stopped by the sensational save of Leboldus. The period ended with the doctors one up.

The engineers entered the third period with the determination to overcome the one goal lead of the doctors. They forced the pace and kept the puck within the vicinity of the Med goal. After five minutes of fast play the Forum bell rang to announce the end of the hour. This left ten minutes of the game unplayed, and the doctors went home with a 2 to 1 victory over the science freshmen.

A statement was obtained from Manager Bud Lockwood of the engineering freshmen who said, "I believe that my boys could have pulled the game out of the fire if we had had the extra ten minutes of play".

Hockey Practice

As 12 to 1 o'clock at the Mount Royal Arena did not seem a very practicable hour, another was to have been substituted. This, however, has not yet been fulfilled, so that the following seniors are asked to phone the Athletic Office, L.A. 7564, before 11 o'clock this morning for a final statement. Powers, McTeer, McGillivray, Ward, Farquharson, Doherty, Farmer, McGill, Crutchfield, McHugh, Johnson, Taylor. All those who have not already returned the proofs should bring them to the senior practice at the Mount Royal Arena today.

Arts '31

The following members of the class of Arts '31 have not as yet given their addresses to the permanent class secretary, Robert Picard, and should do so immediately:—

Bavitch, Berger, Cameron E., Cohen A.E., Draper, Eakin, Edson, Erick, Fulford, Golfman, Haas, House, Katz, Kaufmann M.L., Kivenko, Levitsky, McCully, McKay, Ogilvie, Patterson, Poland, Russel, Sampson, Shuirman, Talbot, Twitchell, Webster E.C., Racey, Aronovitch, Baron, Butler, Clark, Lafave, Seltzer, Seymour, Sharp, Siminovitch, Small, Sutton, Townsend, Werry 'Ball, Bercovitz, Bercu, Brodie, Feigenbaum, Henderson, Kelly, Macalister, Mason, Morton, Nornington, Richardson, Rubin, Shuster, Bailey, Bernstein, Lapin, Margolick, Orlando, Rosen, Yelin, Cripps, Haber.

The secretary may be found in the Arts Building from 11 to 1 on Tuesday and Thursday mornings, or by appointment.

Engineer Nine Beat Medicine In Close Game

Both Batteries Strong As Players Swing Widely At Fast Curves

ATKINSON STARS

IN a regular scheduled inter-faculty baseball game the Science nine defeated the Medicine team in a close game by the score of 13 to 8. The Med team came from behind to tie the score but faltered in the two final frames and the Engineers scored six runs to make the game sure. Atkinson Med pitcher fanned 12 engineers but he was given poor support both on the field and at bat.

After long trips from their training grounds where they spent all last month, both teams were ready to start when the referee called the game. The Plumbers started when the first ball was pitched, when the first two men up went safely to the bags, but pitcher "Blondie" Atkinson showed that he meant no fooling when he struck out the next three Engineers to face him. Med came in strong in their half of the inning and scored a run to take an early lead.

The Science team not to be outdone by the Doctors tied the score in the second inning, gained a one run lead in the third and went further ahead in the fourth when they scored three runs on some loose fielding by the Med nine.

Facing a four run deficit in the fourth inning, Med did some timely hitting and scored four runs in the fourth and fifth innings to make the score seven all. Atkinson, Med hurler was taking care of his job as he was steaming the ball across the plate and the engineers were whiffing at the ball. One had to swing at the ball before it left the pitcher's hands in order to hit it.

In the sixth inning with two men out and two men on base the Med infield let Dean Nesbitt's get away and two men raced across the plate giving the Science team a two run lead. The internes could do nothing against Bud Crain's pitching and Nesbitt finished the inning as he took a long fly in the field and tossed out the runner at first base for a nice double play. In the seventh inning Science consolidated their lead as Atkinson weakened, and before he could retire the side four runners had crossed the plate. With a six-run lead to overcome in one inning, Med got away to a good start when one man had crossed the plate and two men were safely resting on the bags. Here Crain did his duty as he carefully struck out the next three men to face him.

Amalgamation Vital Problem in Opinion Of Women Speakers

(Continued from Page One)
These two, if fused together, would form one society representing the undergraduate body as a whole, and the present M. W. S. S. would cease to exist, she said. The chief advantage of this fusion, she stated, would be the getting rid of much red tape and the creation of closer co-operation between the men and women undergraduates.

Cornell Meeting McGill Debaters In Last Tourney

(Continued from Page One)
change student to the University of British Columbia last year.

Subject Important

The subject of the evening is one of great scope for the powers of both Goldenburg and Stone and at the same time is of particular interest to the general public. The subject of American foreign policy has already been discussed this season and was received with interest. The Porto Ricans dealt with the American's treatment of the continent. The visitors from Cornell discuss the American policy in Europe which is of tantamount importance.

Tickets on Sale

Tickets for the second McGill-St. Francois hockey game to be played at the Mount Royal Arena on Monday night next, are now on sale at the Athletic Office in the Union.
In view of another probable sell-out, those desiring tickets are asked to get them early.

"Say, waiter, there's hair in the honey, in the ice cream and in the apple sauce."
"Why that's strange, str. I can understand how it was in the honey—that came from the comb, and the ice cream is easy to explain, too, sir, because we used shaved ice, but, Lord, sir, how that hair got in the apple sauce is beyond me, because I bought them apples myself and the farmer told me they was Baldwins."
—Colorado Dodo.

Straw berets are now worn in Paris. In London they are eaten with cream. —Witt.

Copernicus Began Study of Nebulae

Motions of Other Universes Give Einstein Equations

As Copernicus lay dying, there was thrust into his hands a copy of his "Revolutions of Spheres," this the first contradiction of the old geocentric theory, was the beginning of modern astronomical theory. From this day, in the year 1542, said Prof. Gillson at the meeting of the Royal Astronomical Society last night, we date all advance in the mathematical conceptions of this science.

To the development of the telescope, from Galileo's tiny one, to that of Ross in the 19th century, is attributed part of the great progress made in the investigation into the nature of nebulae, which presented, for a long time, an almost insurmountable difficulty to astronomers. The telescope demonstrated the true stellar nature of many nebulae, as well as the semi-gaseous nature of others, the latter being what are now regarded as actual nebulae.

With the advent of the modern spectroscopic, it was possible to find much additional data about the mass and movements of these bodies. In fact, a very large part of all the figures available about nebular properties are directly due to spectroscopy. The movements of the enormous number of lesser nebulae which exist beyond the confines of our particular universe, have been estimated by means of spectrum analysis. From their apparent motion away from this universe, a number of very startling conclusions have been drawn, among them some of the Einstein equations which give, for the effective total radius of the whole space, which radius is, remarkably enough, not constant, but always increasing, so that its value is doubled in every 2000 million years. This is one of the most recent and startling results of the analysis of the light given off by nebulae.

Red & White Revue Notes

TODAY

USHERS. There are four or five openings for men ushers on Wednesday and Thursday night. Communicate with J. A. Hutchins, Westmount 2602. Women interested see Doreen Harvey-Jellie.

"TRIAL BY FURY." There will be a rehearsal for all members of the cast after the business meeting of the Choral Society at 8 p.m.

CHORUS. Rehearsal for all men and girls in the Ballroom at 5.15 p.m.

ORCHESTRA. Practice at 7 p.m. sharp in the Union Ballroom.

PRINCIPALS. All soloists (singing and dancing) who can possibly do so are asked to be present at the orchestra rehearsal tonight, to go through their numbers. This includes the Misses Brown, Eaves, McKay, Madley, Schurman and Taylor and Messrs. Bazar, de la Vergne, Denton, Hallett, Harvey, Ryan and Sellar.

PROLOGUE. The Misses Lyth Miller and MacNamee will please get their parts off the R.V.C. notice board this morning. They will also meet Miss Burris in the R.V.C. Common Room at 5 p.m. for rehearsal.

LOW JEST. Rehearsal at 6 p.m. for the entire cast in Strathcona Hall. It is very important at this late date that all members attend and be on time.

TOMORROW

Rehearsal of the entire show in the Union Ballroom at 2 p.m. and in Myrse Hall at 7 p.m.

Nurses Aren't Tough Harriet Smith Claims

By EXCHANGE SERVICE

Superintendents of nurses are not all severe, white-haired persons who smell vilely of anaesthetics.

One could better imagine Harriet H. Smith, former Washington student, now assistant professor in the nursing school, as an instructor in a Charm School rather than the newly appointed superintendent of nurses at the Harborview hospital.

Tall, brunette and alive with personality, Miss Smith, yesterday confided that she detested liver, has developed a passion for mushrooms, does on historical novels, and loves to drive ramshackle automobiles!

Hard-Boiled

"Are all nurses characteristically hard-boiled? I hope not," emphatically declared the graduate of Mt. Holyoke college, the Seattle General hospital, a former Yale instructor and student of Columbia Teachers' college.

"It is true the average nurse develops a professional air which is the result of meeting all sorts of persons and situations," she admitted, "but it is not a hard-boiled attitude. Because of her responsibilities, a nurse necessarily keeps to herself."

"War enthusiasm as much as anything attracted me to the profession," she went on. "I entered training just after war was declared. As for qualifications of a nurse, she must be skilful in her profession, intelligent in learning about her profession, and invested with a real humane spirit."

Motor Cop: Hey, you! Didn't you hear me say, "Pull over there?"

Driver: Why, I thought you said "Good afternoon, Senator."

M. C. (smiling): Isn't it a warm day, Senator?

—Yale Record.

J. Lecky, P. Dennis, M. McNaughton.

We, the undersigned, nominate **George Dodd** of the first year for the position of assistant secretary of the Engineering Undergraduate Society. C. W. Davis, C. W. Morrison, A. G. Gar-yock, A. Deane Nesbitt, O. K. Ross, Charles P. Sturdee, J. S. Wallace, H. Newton, Douglas H. Cross, Arthur W. Shute.

We, the undersigned, nominate **Mr. O. K. Ross** as a candidate for the position of Asst. Secretary of the Engineering Undergraduate Society. E. F. Brown, R. Schofield, Nelson Outch-field, J. Winn, F. Shaw, G. Strarnter, Henan C. Young, A. McMath, A. G. Mellor, Lionel Swift, R. Renold, A. H. Paton, A. R. McLennan, J. S. Moynan, G. D. Roberts, Thos. Mullen, H. A. Perego, Hugh D. MacGregor, R. G. Lonergan, S. Varkovnick, D. Parent, Archie S. Pistrich, J. Tannewbaum.

Motor Touring In Europe Good

Mechanics' Institute Hears Dr. Gurd Tell of Trip

To an audience which filled the Mechanics' Institute hall to capacity and to those who crowded the corridors unable to get seats, Dr. Fraser Gurd described a motor trip through Europe, last night. The speaker took this tour in 1929 and the latter part of 1930, and covered practically every state of that country. He stressed the ease of getting about in all countries, the good roads, the convenient traffic laws, and above all, the politeness of every single citizen.

Dr. Gurd started from Canada with his automobile; when he landed at Liverpool he was handed a complete set of documents, license plates and all the necessities by the Royal Automobile Club at Liverpool. At first rather confused by the left hand drive, he got on quickly. He was surprised by the number of pedestrians on the streets, and informed his audience much to their amusement, that the pedestrian had the right of way.

Sees All Europe

Leaving England after a short tour, he went on to the Continent, going through France, Italy, Austria, Czechoslovakia, Germany, Switzerland and Belgium. A short trip through Norway and Sweden followed. As the tour lasted over a period of almost a year and a half he was well able to cover the ground quite minutely. The cathedrals of England alone would be worth a whole trip.

Stresses Modernity

The outstanding part of the trip was the change in Germany since the war. All is very modern. Due to the privations of the war almost all the older people have been killed off and Germany is a nation of youth. They are forgetting the war and have no rancour against any other nations. They are particularly friendly towards the British. Everywhere through the country the travellers were hospitably received. The Hotels are all clean, cheap, and pleasant. The cities themselves are beautiful. The authorities are doing their best to perpetuate the old styles of architecture in the old towns and all new buildings must conform to the old designs.

Everywhere through Europe the roads are excellent, the traffic laws fair and well enforced, and, the Doctor stressed the driving is far better there than in Montreal. The only part where the traffic is really unpleasant is in England where there are a large number of busses.

NOTICES

All notices must be turned into the Daily office in writing before 8:30 on the night previous to publication. Notices will not be received over the telephone.

COMMERCIAL SOCIETY

Nominations are called for the executive positions in the Commercial Society. They are to be in the hands of the executive or given to Bill Gentleman by noon March 16. The following offices are to be filled: President from the third year, Secretary from the third year, Vice-president from the second year and Treasurer from the first year. Nominations are to be signed by 10 commerce undergraduates. Elections will be held Monday March 23.

ATTENTION ARTS 51

Those who have not yet given their permanent addresses to the secretary, Robert Mcard, for future files please do so as soon as possible.

RED AND WHITE REVUE

Students wishing to usher at the Review communicate with J. A. Hutchins at Westmount 2602.

EATON'S

The New **Birkdale Specified** SUITS FOR SPRING

NOTE
A New Clothing Service

While we are confident that with the big selection of body types we present we can fit properly nearly every man—should you not find the size you require in the particular cloth you prefer

WE WILL MAKE A SUIT TO YOUR MEASURE EQUAL IN QUALITY OF MATERIAL AND WORKMANSHIP AT THE SAME PRICE. THIS APPLIES ON ALL SUITS FROM 25.00 UP.

ONE PANT 35.00 **TWO PANTS 45.00**

Eaton's—Second Floor, St. Catherine St.

THE HAT

Hats bear out the good name they bear and are presented in new shades of dove grey, opera, savoy, glow, tint-o'-maroon and different browns. They are made of fine, smooth felt in the correct new shapes and they have "barstain" sweatbands and taffeta linings.

6.50

Sizes 6 3/4 to 7 1/2

Eaton's—Second Floor, St. Catherine St.

THE SHOE

Shoes are of such excellent quality that the question arises why should one pay more—even if one wants the best? Solid leathers—calf or kid—fit "like a glove"—keep their good looks to the end and a broader range of sizes—

7.00

5 to 13. Pair
